September 2020						
Su	Mo	Tu	We	Th	Fr	Sa
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19

If this is your first time registering, click on **Create New Account** under New Users. If you've registered for courses in the past, click on **Login to my Account** under Returning Users.

### New Users

If you have **NOT** registered online before, or have not received your username and password, please click the button below to create your Account.

[Create New Account](#)

### Returning Users

If you **have** registered online before, please click the button below to Log In to your Account. This will pre-fill all of your information and allow you to register more quickly.

[Login to My Account](#)

**New Users:** Under “New Users” click on **Create New Account**

Here you will decide if this is going to be a **personal account** or an **organization account**.

If you are doing registrations for yourself only, you will create a personal account. A credit card will be required for payment to finalize your registration. If your company is paying for the class, you would submit a receipt to them for re-imbursement.

If you are registering multiple people from your company AND you will oversee getting payment for the classes to Lake Superior College, then you would create an Organization account. If you would not be the person doing this, then you should contact your company, so they can set this up.

Carefully follow the instructions on each screen for setting up the account. **You must AT LEAST fill in all sections with a \*** but you should make your account as complete as possible.

**ATTENTION: If you are an organization and will be paying with a Purchase Order, you will need to email or call for approval. When paying with a PO you must upload a file in PDF format.**

**Registration Specialist:**

Shannon Wark  
218-733-7680

### Bituminous Plant

Options include Bituminous Plant 1 and 2.  
Recertification for all is available in a classroom setting.  
Subjects to be covered are the following test procedures: Maximum Specific gravity (Rice Test), Air voids, and bulk specific gravity as determined from Marshall specimens demo and explanation of Gyrotatory specimens and con pavement cores, extraction and gradation of salvaged-asphaltic aggregate (RAP), and the Tensile Strength Ratio (TSR-Lottman) test.  
Bituminous Mix Design requirements and working ranges specified by MnDOT specifications. It also covers subjects such as blending aggregates and recycled mixture design. There will be a day of lab work as well as four day classroom. This course prepares the student for doing MnDOT Trial Mix Design submittals.
